

Operator Aboard Battery Extractors

BHS offers a variety of distinct Operator Aboard Battery Extractors. Each Battery Extractor is designed and built for a specific application, yet all share common features and benefits which make them the most versatile, reliable and cost-effective Battery Extractors in the industry.

Operator Aboard Battery Extractors

Not all battery extraction applications demand the same handling solutions, equipment or stacking requirements. To suit a variety of needs, BHS offers several distinct Operator Aboard Battery Extractors.

Strict Quality Assurance

BHS inspects every product made including manufactured parts, powered equipment and all Battery Extractors to provide the highest quality product to meet all performance needs. Every Operator Aboard Battery Extractor undergoes up to ten hours of actual run time and two 108-point inspections prior to shipment in order to confirm quality assurance.

Features & Benefits

- Heavy-duty steel frame handles the toughest applications
- Low maintenance design reduces preventative maintenance intervals
- No exposed components for added safety
- Durable, two-part epoxy finish resists both acid and scratches
- Manual control of hydraulics for easy operation
- Vacuum extraction reduces wear and tear on batteries (standard on all Battery Extractors except BE-MS)
- Non-proprietary hydraulic and electrical components lower replacement part costs
- Lowest power requirements in the industry for economical operation
- Quiet running dual floor drive system provides positive traction on wet or dry surfaces*
- BHS exclusive Non-Inter-Flow (NIF) hydraulic manifold system stabilizes the lift cylinders to ensure a level roller bed during load transfers*
- Four lift cylinders, in combination with four-point equalization, assures smooth and level vertical handling of the roller bed while it's fully loaded*
- Five hydraulic-powered rollers per compartment provide a brake for safe, easy battery transfer*
- Induction type proximity switch disables floor drive to protect equipment when the extraction arm is extended outside the Battery Extractor perimeter*

* Not available on BE-MS or BE-SS

Audible Alarm (BE-AUDALM)

Alarm is activated while machine is in operation to notify pedestrians that the Battery Extractor is in use

Custom Lasered Logo (BE-LOGO)

Custom logo can be added to the front panel of the Battery Extractor

Extended Reach (BE-EXTRCH)

Increases the reach of the extractor arm and is ideal for use with forklifts with outriggers (not available with Magnet)

Horn (BE-HORN)

Horn is utilized by the operator to alert pedestrians

Keytroller (BE-KEYTROLLER)

Provides a timed lockout until an operator logs in and provides the ability to schedule maintenance, pre-operation checklists, and operator training

Level Assist Indicator (BE-LAI)

An LED on the dash of the Battery Extractor alerts operator when proper vertical alignment with stands is achieved

Magnet Extraction (BE-MAG)

Ideal when batteries are too narrow for vacuum extraction (not available with Extended Reach option)

On-Board Water Cart (BE-WC)

Allows quick, easy battery maintenance from the Battery Extractor during battery change-out

Operator Shield (BE-OS)

Isolates operator console from BE roller deck

Overhead Guard (BE-OHG)

Protects the operator from falling objects

Power Roller Cut-Out (BE-PRC-1/-2)

Disengages powered rollers requiring additional input from operator to discharge battery from extractor

Safety Scanner (BE-SICK)

A compact system which scans the area in front and behind the Battery Extractor to identify objects or pedestrians in its detection zone, stopping movement of the Battery Extractor upon detection

Strobe Light (BE-STBLT)

Visually notifies bystanders when machine is in operation

Single Side

The BHS Single Side Battery Extractor (BE-SS) features a heavy-duty structure with various available options to meet specific needs. The BE-SS is fully-hydraulic, track-mounted, and floor driven for added convenience. The vehicle's control console is located on the rear of the machine for unobstructed operation. The BE-SS also features eight load rollers and 8" (203 mm) poly-drive wheel.

BE-SS

Single Level

The BHS Single Level Battery Extractor (BE-SL) is the perfect solution for lower capacity applications with a battery fleet containing up to 99 batteries. The BE-SL makes removing and replacing discharged batteries faster and easier than ever.

BE-SL

Double Stack

The BHS Double Stack Battery Extractor (BE-DS) is designed for applications with a battery fleet containing up to 149 batteries. As with all BHS Operator Aboard Battery Extractors, the BE-DS is a safe, cost-effective solution to battery handling requirements and saves vital floor space, increasing the capacity of a battery room.

BE-DS

Triple Stack

The BHS Triple Stack Battery Extractor (BE-TS) offers a greater opportunity to optimize floor space for valuable warehousing functions. This system is ideal for a battery fleet of up to 299 batteries. Like all BHS Operator Aboard Battery Extractors, the BE-TS is designed and built to expand as battery handling needs grow.

BE-TS

Quad Stack

The BHS Quad Stack Battery Extractor (BE-QS) offers the best solution for large battery changing operations. The BE-QS provides optimum floor savings while providing the latest technological advancements in battery changing equipment. Quad Stack models are designed for fleets with 300 or more batteries.

BE-QS

Competitor Replacement

The BHS Competitor Replacement Battery Extractor (BE-MS) is specifically designed for battery systems with aisles as narrow as 52" (1321 mm). The extra heavy duty base design allows for greater load handling capacity. Access to each compartment on the Battery Extractor is quick with the hydraulic powered, multi-axis extractor arm. The BE-MS utilizes magnet extraction. Twelve load rollers on model BE-22-2-SL and twenty-four load rollers on model BE-14-4-SL allow for better load and wear distribution. The roller bed divider is easily removable to accommodate larger batteries as needed. Alignment is easy with the center line marked on the lead rollers.

BE-22-2-SL

Competitor Replacement

BHS also offers the Competitor Replacement Battery Extractor (BE-MT) models: Single Level (BE-SLN), Double Stack (BE-DSN), and Triple Stack (BE-TSN). Each machine is designed and built for applications utilizing a 72" (1828 mm) aisle width.
