

# eGO!mini™

## COMPLEX DATA, SIMPLE INFORMATION

Using the latest in micro processing technology, the eGO! Mini™ continually monitors a battery's performance and usage. It also features in-built indicators that show warnings for low electrolyte, high temperature and USB status. It stores all the data it collects on the USB drive which is housed within a tough and durable shell.

The USB is easily removed and when it's uploaded to [www.batterymanagement.net](http://www.batterymanagement.net) it gives you a user friendly visual representation of the data it collects. Voltage, temperature and electrolyte levels are recorded and provide warnings if misused. This means you can easily track the usage of all your batteries 365 days a year.

## MINI BUT MIGHTY

### EXTENSIVE INFORMATION

The eGO!mini™ is comprehensive, showing detailed cycle by cycle logs for battery voltage, temperature and electrolyte levels. Giving you all the information you'll need to fully monitor your battery fleet.

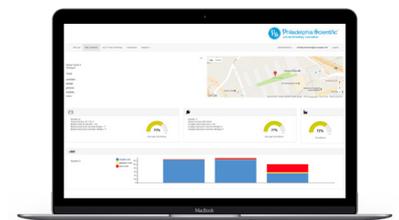

### SIMPLE TRANSFER

The plug and play USB stick that comes with each eGO!mini™ allows you to quickly upload and update the data for each of the batteries, it can even be done at each station by using a tablet or laptop device.

### VISUALISED DATA

Simply log in to your dashboard on [www.batterymanagement.net](http://www.batterymanagement.net) and the battery data is brought to life in interactive graphics that require no specialist knowledge to understand.

### EASY TO USE

**batterymanagement.net** gives you a site by site and battery by battery breakdown of all the data eGO! Mini™ collects.
